Domain CEO Appointment

All,

This morning we announced the appointment of Antony Catalano as the new Chief Executive Officer of Domain.

Antony founded and has driven the success of Metro Media Publishing (MMP), a business we have had a 50% interest in since July 2012. Since then, MMP has been selling our Domain products in Melbourne – and they have been very successful.

Antony leading Domain is the natural next step. We have no doubt that Antony is the right person and will take it to its full potential.

Anyone who has worked with Antony knows he is innovative, entrepreneurial and highly competitive. His knowledge of the Australian real estate market is second to none.

We know that Antony is excited to be taking on this role. He knows the Domain business very well and is looking forward to making Sydney even stronger for us and is focused on growing market share in Melbourne. We all believe there remains significant potential in these and other markets.

Antony will be meeting with the Domain team in the coming days.

I would like to take this opportunity to thank Tony Blamey for his enormous contribution to the business in the

transition to the new structure.

Please join me in welcoming Antony to his new role.

Regards,

Greg
