## **About the Poll**

This report summarises the results of a weekly omnibus conducted by Essential Research with data provided by Your Source. The survey was conducted online from the 14<sup>th</sup> and 18<sup>th</sup> November and is based on 1,036 respondents.

Aside from the standard question on voting intention, this week's report includes questions on important issues, live exports and the Royal Commission into child abuse.

The methodology used to carry out this research is described in the appendix on page 10.

Note that due to rounding, not all tables necessarily total 100% and subtotals may also vary.

**Federal politics – voting intention**

The two-party preferred estimate is calculated by distributing the votes of the other parties according to their preferences at the 2010 election. These estimates have a confidence interval of approx. plus or minus 2-3%.

*Note - Differences are calculated by subtracting Liberal % from Labor % - except for the two issues on which the Greens lead in which case it is Greens minus Liberal.*

Labor leads the Liberal Party on ensuring a quality education for all children and a fair industrial relations system. The Liberal Party has maintained strong leads on management of the economy, controlling interest rates, political leadership, security and the war on terrorism, treatment of asylum seekers and managing population growth.

There is little difference between Labor and the Liberals on ensuring the quality of Australia's health system and protecting Australian jobs and protection of local industries. Since June, there has been a shift in Labor's favour on most issues - especially, ensuring a quality education for all children, controlling interest rates, housing affordability and security and the war on terrorism.

## **Appendix – Methodology**

The data gathered for this report is gathered from a weekly online omnibus conducted by Your Source. Your Source is an Australian social and market research company specializing in recruitment, field research, data gathering and data analysis. Your Source holds Interviewer Quality Control Australia (IQCA) accreditation, Association Market and Social Research Organisations (AMSRO) membership and World Association of Opinion and Marketing Research Professionals (ESOMAR) membership. Senior Your Source staff hold Australian Market and Social Research Society (AMSRS) membership and are bound by professional codes of behavior.

Essential Research has been utilizing the Your Source online panel to conduct research on a week by week basis since November 2007. Each Monday, the team at Essential Media Communications discusses issues that are topical. From there a series of questions are devised to put to the Australian public. Some questions are repeated each week (such as political preference and social perspective), while others are unique to each week and reflect prominent media and social issues that are present at the time.

Your Source has a self-managed consumer online panel of over 100,000 members. The majority of panel members have been recruited using off line methodologies, effectively ruling out concerns associated with online self-selection. Your Source has validation methods in place that prevent panelist over use and ensure member authenticity. Your Source randomly selects 18+ males and females (with the aim of targeting 50/50 males/females) from its Australia wide panel. An invitation is sent out to approximately 7000 – 8000 of their panel members. The response rate varies each week, but usually delivers 1000+ responses. The Your Source online omnibus is live from the Wednesday night of each week and closed on the following Sunday. Incentives are offered to participants in the form of points.

EMC uses the Statistical Package for the Social Sciences (SPSS) software to analyse the data. The data is weighted against Australian Bureau of Statistics (ABS) data.
